**Subject:** The Microsoft case

Time is running out, and freedom, whatever the flavor to which you cleave, is at stake.

Microsoft wants to control people through their software. Today or in the near future, it will control the people, but within the years, if Microsoft gets into all kinds of digital equipment (they now want to have their software on the digital hub in the house, in a PDA, in a mobile phone etc), it will control the government too. Do not let this happen. Microsoft's ultimate goal is to create an artificial intelligent software that can spy and manipulate our personal data. And if FBI or CIA or whatever run Microsoft products in the future, that sensitive data will also be at stake. At fist, they will supposedly, work with the authorities or the government for this, but as the years go by, they will try to use this information against the authorities. Everyone's freedom is at stake with M\$. Please split the company or make them open source the operating system and the browser.

Their illegal ways of keeping the monopoly, has resulted my husband lose his job. His company bailed out for not being able to make their SUPERIOR opearating system successful, because Microsoft had special NDAed agreements with OEMs to only install Windows and not other operating systems. Result: The company bailed out, my husband laid off. No matter how hard they tried, they could not compete with Microsoft's illegal agreements with the OEMs. I am talking about this illegal agreement btw:

My teacher at college used to say:  
"The one who controls the 'information' is the one true governor."  
Don't let Microsoft have MY or YOUR 'information'.

Thank you,  
Eugenia
